**Post Op Vision: Left Eye: 6/36**

**Date of Admission: 21/01/2014**

**Date of Discharge: 24/01/2014**

*I am Teja Devi (75) suffering from Cataract in the Left eye for the last one year and my right eye had no vision and blind in one eye. At this point in time I am physically weak and dependent on my children. Due to poor financial conditions we are unable to get the treatment done in the private hospital. But one day I got to know about the free outreach camp organized in my native place Bhindki and my neighbour suggested that my son bring me here for the surgery/ treatment. I came to Sadguru Netra Chikitsalaya through free eye camp and stayed here for my surgery in the left eye. I am Hypertensive that's why I stayed here for 2-3 days to normalize my blood pressure and to be fit for surgery. During the whole circumstances my son helped me a lot to make me free from all worries. The very next day after rechecking of vital signs, I was sent to OT for the cataract surgery as I was fit for the same and after few minutes my purpose was solved, as I got the treatment on my left eye. After surgery I got satisfactory vision i.e. 6/36 and able to see without any trouble. Now I will be able to do work by my own and will lead an independent life. My son and I both are happy and contented with the services we got in "Sadguru" (SNC).*
