*Saurabh Gupta, a 2 year old child a close relative of Vandana Gupta( Patient Details has been mentioned above)and has the same case history of the family prognosis of Congenital Cataract and squint by birth. He had the same conditions as his relative Vandana. Saurabh's father brought him for cataract surgery in the right eye. He came along with some relatives who had the same problem and eventually after consultation with doctor they found the family case history of Congenital Cataract/ Zonular Cataract by birth of their young ones. They belonged to low socio-economic status thats why due to poor financial conditions and lack of awareness they were unable to avail of expensive surgical and medical services from the Hospital. But at SADGURU NETRA CHIKITSALAYA they got free treatment and surgery They got a ray of hope for Saurabh's vision for a life time.Saurabh's parents got the information about SNC services through word and mouth of some experienced persons who had visited Snc and got the treatment done here.*

*After having surgery on the right eye now, Saurabh is able to see to some extent(2 FFC) and according to doctors advise his vision will improve as he grows up and would take some precautions. His father is planning for his future and wants his son to be educated and independent for a life time. Saurabhs father wants to bring him for the surgery on the left eye after a month.*
