Pre-op Vision: RE: 1/60, LE: 2/60 (without Glass; High Myopia)

Post-op Vision: RE: 6/6, LE: 6/6(Normal Vision)

I Manish aged 24 years, my financial condition was not so good and I suffered from High Myopia since my childhood. Due to High Myopia, I had to quit studies and remain helpless after getting the social negligence from my family and relatives. I used to avoid attending social gatherings and did not think about marriage and job. Fortunately, I got a job in SNC as Patient Care Taker in 2010. But, I used to have troubles during my day to day work. Finally, my seniors Mr. Devendra Singh Sachan and Mr. Vishnu Kant Mishra motivated and helped me a lot to undergo Phakic IOL surgery in both eyes. I got a ray of hope in terms of Sadguru Netra Chikitsalaya and its world class services. In 2011, after going through the surgery, my life changed. I found a different kind of confidence in myself and simultaneously, I was truly fascinated by the service delivery model in SNC and inspired by the work culture and spiritual environment here. Finally, I decided to continue with my job in Sadguru Netra Chikitsalaya and wanted to become a part of this social venture. I also wanted to serve the poor and needy people with the help of any means of work assigned to me for a whole life time. Ultimately, my prayer were answered, I am continuing my job with SNC and working as a patient care taker (till date) in the Audio- visual dept. Fortunately, I learned photography here and now I am known for taking good snaps in my department. Recently I got married with a beautiful girl who has now become my life partner.

Lastly, I would say, Sadguru Netra Chikitsalaya contributed a lot in betterment of my life. Whatever I am, right now it's all because of eye surgery and got back my vision and now I am able to see the whole world around me without spectacles
